

KIC BookClick

DIGITIZE, COPY & COLLATE BOOK CONTENT

*Form meets function with the new
KIC BookClick book copy system!*

***With the new KIC BookClick, it's hard to say
whether form follows function or function follows form***

When people see the new KIC BookClick for the first time, the most common expression is "it's so beautiful." And with True2Touch, it's as easy to use as it is beautiful. Are there any compromises? You decide.

The KIC BookClick captures over 20 book pages per minute. With a bed size 30% larger than its nearest competitor, it captures up to 21x16 inch books and materials at an uncompromising resolution of 300dpi.

Photocopiers, PCs, monitors and keyboards clutter up otherwise beautiful libraries across America. The smooth, triple-layer, pearlescent white KIC BookClick totally reverses that trend. It adds beauty to the most beautiful libraries. Inspired by an outstanding effort of the fledgling tablet industry to turn technology into something more like jewelry or a fashion accessory than a computer, the pearlescent KIC BookClick evokes comments like, "We care about the appearance of our library and this machine is over the top!"

The New KIC BookClick

The KIC BookClick perfectly completes the KIC family of self-serve digitizing systems. It's small, fast and beautiful. The lowest cost member of the KIC family, the KIC BookEdge, is cheaper than most floor standing black-and-white photocopyers, while the flagship KIC Bookeye 4 includes the most durable production book scanner, with a higher quality 600dpi than any other book scanner. It's also the only book scanner with both V-cradle and flat modes. And since no KIC system uses toner or paper, they're environmentally friendly and ultimately far cheaper to run than copiers.

Features and Benefits

The BookClick's sleek look and elegant design put the full KIC self-serve digitization functionality into a mere 25 inch width. It's large, 23 inch touch screen and capture surface are at the perfect heights when placed on a typical table or desktop. The BookClick also has an optional matching stand for freestanding operation.

- Digitize / copy up to 16x21 inch pages in full color
- Create full color electronic images and/or paper copies with just two touches
- Review large electronic images *before* saving or printing copies
- Electronically collate and print copies on a standard laser printer
- Create searchable PDF, JPEG, TIFF, PNG and editable text files
- Create audio files from text for MP3 players, including iPods
- Go 'green'. Promote minimal use of paper and ink.
- Charge for prints, not for images
- Output to USB devices, email, file servers, the Web & printers
- Minimize book spine damage with face-up scanning

KIC BookClick's True-2-Touch screen

Unlike copiers and flatbed scanners, the KIC BookClick allows users to digitize books face-up, without damaging books by having to press them hard against a glass plate. The BookClick's high speed is derived as much from its fast opto-electronics as from the fact that its face-up design obviates the need to flip books over and over again during the digitization process.

The BookClick produces crystal clear, full-color images at no additional cost over black & white images! Searchable PDF's and editable text files are a snap to create. As with all KIC self-serve systems, the BookClick's text-to-speech capability produces audio files that can be played in any MP3 player. Studying and research have never been so easy!

BookClick Technical Specifications

Output Color Depth	24 bit color, 8 bit grayscale & 1 bit B&W
Max Scan Area	16 x 21 inches
Max Resolution	300 dots per inch
Digital File Interfaces	USB 2.0, email, FTP, Web/Cloud storage, file folder (for library staff only)
Image Output Formats	PDF, JPEG and PNG rich text and searchable PDF (optional)
Audio Output Formats	MP3 audio text-to-speech (optional)
Printer Interface	10/100/1000 megabit Ethernet or USB 2.0
Printed Output Formats	8.5 x 11", 11 x 17", simplex, duplex, color & monochrome (printer not included)
Image Treatment Functions	Split pages (left & right), crop, change brightness/contrast, change resolutions (dpi), select color, grayscale, or B&W
Speed	2.1 seconds (full bed); 2.5 second per page for multiple pages
Document Formats	Autoformat w/edge recognition, Letter, Legal, A2, A3, A4, A5
Lamps	White LED's, no IR/UV emission
Dimensions (HxWxD)	36 x 25 x 27 inches
Weight	75 lbs
Power Consumption	150W Operation

Scan Speeds

Digitize & Save to USB 10 Pages at 300 dpi	Digitize & Print (Photocopy) 10 Pages at 300 dpi
30 seconds	30 seconds plus printer time*

* Print time varies depending upon the printer

The KIC Family

A single Bookeye 4 KIC unit can save up to \$175,000 in its lifetime, while the others save in proportion to their cost.
